presents

PANOPTICON

International Workshop

For students and professionals

From October 19 – 23, 2016

Spazio Thetis, Arsenale Nord, f. Calle Donà Castello, 2737, Venice

Workshop scientific curatorship: Andrea Bartoli - Farm Cultural Park; Barbara Cammarata – Polline; Claudia Cosentino, Dario Felice, Antonio Rizzo - Analogique

This workshop will be run in parallel with the workshop on urban security and is the practical portion of the program. It involves the development of a mini research project with the objective of producing Panopticon, a piece of micro-architecture designed to respond to precise criteria of urban control and regeneration. The workshop will also provide an opportunity for a comparative reflection on the tools of the project. It will have a dual objective: creating new relationships in communities and places, and developing innovative processes in the fields of architecture, engineering, urban design and contemporary art.

The workshop includes periods of team effort and periods of individual work. During the four intensive days of the workshop, each participant will have the possibility of designing and constructing a scale product essential for collective brain-storming on the topics presented.

The outcomes of the workshop are an exhibition and a catalogue. The exhibition will revolve around the presentation of the scale models produced during the work sessions. The catalogue will contain a sequence of drawings and articles that describe the content of the designs and the project development process from the concept design to the production of scale models.

Scientific Direction: Fabio Armao and Mila Sichera, DIST -Turin Polytechnic and University
The Turin Polytechnic, in collaboration with Ala Assoarchitetti, will award 15 Professional credits for professionals.
On request, the Turin Polytechnic will issue students with a certificate for European University Credits (ECTS)
